PR 13: Dynamic Air Engineering Awarded AS9100 Quality Certificate of Registration

Santa Ana, CA – DAE Systems / Dynamic-Air Engineering announced today they have been awarded Certificates of Registration to the Quality Standard ISO 9001:2000, plus Aerospace

Quality Standard AS9100B, for design, manufacture, and overhaul of various products and services. The brands produced under this quality system include Dynamic-Air, MilMotion, Mil3PL, and AMPrecise.

Registration is a pre-requisite for growing number of aerospace manufacturers.

"Dynamic Air is dedicated to product excellence and service," remarked President Jeremy Morrison. "In today's market, it isn't enough to claim your product quality is second to none, you have to prove it everyday. AS9100 certification reinforces our readiness and commitment to the highest industry standards in both North America and in foreign markets," Mr. Morrison added.

AS9100 is the industry recognized standard for quality. Also included with this standard are all ISO 9001:2000 requirements. AS9100 certification is awarded only to companies that can prove their dedication to product excellence and customer service.

DAE is a manufacturer of MIL and FAA qualified scalable custom air moving systems and motion subsystems for the commercial aerospace and defense markets.

The Dynamic-Air brand includes fans and blowers for heating, cooling, crew and passenger ventilation, smoke and fume extraction, NBC filtration, defogging, recirculation air sampling, engine cooling, pressurization and particulate scavenging. Related Dynamic Air brands include AMPrecise, a provider of build to print fabrication, Mil3PL, offering third party logistical support, and MilMotion, a manufacturer of electric motors and reliable motion systems. Privately owned and in operation for more than 65 years, DAE Systems /Dynamic-Air Engineering remains a leader in product quality and customer service.
